THE BITCOIN CORPORATION LIMITED

STRATEGIC PARTNERSHIP OPPORTUNITY

Why This Makes Sense

LET'S BUILD THE FUTURE OF BITCOIN TOGETHER

A Real Opportunity to Create What Bitcoin Was Meant to Be

1. FINALLY, REAL TECHNICAL CONTROL

You Get to Build YOUR Vision of Bitcoin

- **65% ownership** - Majority control from day one
- **100% technical autonomy** - No committees, no consensus, no compromise
- **Direct implementation** - Your ideas become reality, not whitepapers
- **No corporate bureaucracy** - You decide, we execute

The Platform Already Exists

- 35 applications already architected and partially built
- Working prototypes you can demo TODAY
- Real microtransactions at $0.01/day per user
- No need to start from scratch - hit the ground running

2. THE ECONOMICS ARE REVOLUTIONARY

Revenue Stream	Conservative Target	Your 65% Share
100M Users @ $0.01/day	$365M/year	$237M/year
1M SMEs @ $100/month	$1.2B/year	$780M/year
100 Enterprises @ $50M/year	$5B/year	$3.25B/year
TOTAL	**$6.5B+/year**	**$4.2B+/year**

Bottom Line: This isn't a startup salary. This is building a multi-billion dollar empire where you own the majority and control the technology completely.

3. PERFECT TIMING IN THE MARKET

Why Now Is THE Moment

- **Post-trial clarity:** The legal battles are behind you
- **BSV needs a killer app:** Bitcoin OS can be that application
- **Enterprises are ready:** They need blockchain but fear complexity
- **Microsoft monopoly is weakening:** Companies want alternatives
- **You have the patents:** We have the execution capability

4. FOCUS ON BUILDING, NOT WAITING

The Judges Had Their Chance - They Missed It

Why wait for courts to understand what we can build today?

- **No more waiting:** Don't wait for Supreme Court validation that may never come
- **Why risk it anyway?** Another judge, another misunderstanding - or we just build
- **Show them instead:** Let's show the world what Bitcoin really is through working code
- **Technical focus:** Build the system you always envisioned
- **Legacy through code:** Bitcoin OS becomes your technical monument

5. UNIQUE STRATEGIC ADVANTAGES

What Only You Bring to This

- **Protocol-level understanding:** You know Bitcoin's true capabilities
- **Patent portfolio:** Your IP becomes productized
- **Enterprise credibility:** "The inventor of Bitcoin" opens doors
- **Technical authority:** Your word ends technical debates
- **Global recognition:** Like it or not, you're famous

What We Bring to You

- **Execution machine:** We build fast and ship daily
- **No ego conflicts:** You lead technically, we handle operations
- **Proven development:** 35 apps already in progress
- **Market focus:** We handle sales while you build
- **Aligned incentives:** We only succeed if you succeed

6. THE TRUST STRUCTURE YOU WANT

Bitcoin Development Trust Integration

- Your shares can be held by your trust
- Direct control of trust operations
- Company and trust objectives aligned
- Your vision of Bitcoin development funded and realized
- No interference with your broader mission

7. NO CORPORATE BULLSHIT

What This Deal DOESN'T Have

- **NO fixed salary** - You don't need our money
- **NO non-compete** - Bitcoin needs open development
- **NO management oversight** - You run technology
- **NO board politics** - Your 65% controls decisions
- **NO vesting cliffs** - 50% is yours on day one
- **NO exit pressure** - Build for the long term

8. THE ENTERPRISE OPPORTUNITY

CitiBank Alone = $450M Opportunity

They spend $500M/year on Microsoft. We can provide better security, perfect audit trails, and employee incentives for

$50M/year. That's ONE customer. There are thousands.

Why Enterprises Will Buy From You

- **"We're buying from Satoshi"** - Ultimate credibility
- **Protocol-level security** - Only you can guarantee this
- **Patent protection** - Your IP protects their investment
- **Direct support** - The inventor maintains their system

9. IMMEDIATE IMPACT

What Happens When You Sign

- **Day 1:** You own 32.5% immediately (50% of 65%)
- **Day 2:** Full access to all code and architecture
- **Week 1:** Your technical decisions start shipping
- **Month 1:** First app launches under your direction
- **Month 12:** Remaining 32.5% vests (or earlier at £10M revenue)

10. THE ALTERNATIVE IS WORSE

What Happens If You Don't Sign

- We build it anyway, but slower and probably wrong
- Someone else claims to build "Satoshi's Vision"
- Your patents remain theoretical papers
- BSV continues lacking a killer application
- You spend more time in courtrooms than building
- The narrative remains "Craig claims" instead of "Craig builds"

The Simple Truth

You understand Bitcoin better than anyone.

Here's 65% of a company and complete technical control.

No tricks. No leash. No corporate games.

Together we can build what Bitcoin was meant to be.

The technology is ready. The market is ready.

Let's do this.

The Opportunity

"Join us in building what Bitcoin was always meant to be - a global operating system for value."
