THE BITCOIN CORPORATION

BSV Ecosystem Tracking

Bitcoin SV Integration Strategy

Document Version: 1.0 | Date: November 2025 | The Bitcoin Corporation LTD

BSV/MetaNet Competition Tracking

🎯 Key Repositories to Watch

MetaNet Desktop Projects

- **Main Repo**: https://github.com/bitcoin-sv/metanet-desktop

  - Desktop wallet for BRC100

  - Built with Tauri, React 18.3.1, TypeScript

  - Uses BSV SDK v1.4.9

  - Active development in 2024-2025

  - Windows releases signed by BSV Association

- **Mirror**: https://github.com/bsv-blockchain/metanet-desktop

  - Same project, different organization

- **MetaNet Mobile**: https://github.com/bitcoin-sv/metanet-mobile

  - Mobile companion to desktop

  - Identity and micropayments focus

Core BSV Infrastructure

- **Main Node**: https://github.com/bitcoin-sv/bitcoin-sv

  - Core BSV node implementation

- 67 repositories in organization

- **SPV Wallet**: https://github.com/bitcoin-sv/spv-wallet

  - Simplified Payment Verification wallet

- **ARC**: https://github.com/bitcoin-sv/arc

  - Transaction processor

🛠️ Technology Stack They're Using

Desktop Technologies

- **Tauri Framework** - Rust-based alternative to Electron
- **React 18.3.1** - UI framework
- **TypeScript** - Type safety
- **Material-UI** - Component library
- **BSV SDK** - Blockchain integration

Development Tools

- **sCrypt** - Smart contract language
- **BitSV** - Python BSV library
- **bitcoinj** - Java library
- **HandCash Connect SDK** - App development SDK
- **Babbage** - MetaNet app framework

🏢 Major Players

BSV Association (BSVA)

- Main organization pushing BSV development
- Maintains core repositories
- Signs Windows releases with DigiCert

Key Wallets/Platforms

1. **Relysia** - Developer super-tool and wallet
2. **DotWallet** - Multi-asset wallet (BSV, ETH)
3. **Tique** - Token and Jig management
4. **RelayX** - Buy/sell/use BSV platform
5. **HandCash** - User-friendly wallet with SDK

Infrastructure Providers

- **nChain** - Blockchain technology solutions
- **mintBlue** - Data control for businesses
- **MatterCloud** - Developer services

📊 Competitive Analysis

What They Have

✅ **Established ecosystem** - Multiple wallets and tools

✅ **Developer SDKs** - HandCash, Babbage, etc.

✅ **Desktop wallet** - MetaNet Desktop with Tauri

✅ **Mobile support** - MetaNet Mobile

✅ **Smart contracts** - sCrypt language

✅ **Multiple language support** - Python, Java, JS libraries

What Bitcoin OS Has That They Don't

✅ **Full OS experience** - Not just a wallet

✅ **Integrated app ecosystem** - 19+ Bitcoin apps

✅ **@bitcoin-os/bridge** - Reusable component system

✅ **Modern web stack** - Next.js 15, React 19

✅ **Better UX** - macOS-style interface with dock, taskbar

✅ **Unified branding** - Consistent Bitcoin OS across all apps

Their Advantages

⚠️ **More mature** - Years of development

⚠️ **Funding** - BSV Association backing

⚠️ **Native desktop** - Tauri vs web-based

⚠️ **Established user base** - Existing wallet users

🔍 Things to Monitor

Technical Development

- [ ] MetaNet Desktop releases
- [ ] New SDK features
- [ ] Smart contract capabilities
- [ ] Performance improvements
- [ ] New app integrations

Strategic Moves

- [ ] Partnership announcements
- [ ] New wallet features
- [ ] Developer tooling updates
- [ ] Marketing campaigns
- [ ] Conference presentations

🚀 Our Competitive Strategy

Short Term (Q1 2025)

1. **Launch @bitcoin-os/bridge** - Enable rapid app development

2. **Expand app ecosystem** - More Bitcoin apps than BSV

3. **Developer experience** - Better docs, easier integration

4. **Mobile responsive** - Work on all devices

Medium Term (Q2-Q3 2025)

1. **Native desktop** - Consider Tauri/Electron for performance

2. **Wallet integration** - Full wallet capabilities

3. **Smart contracts** - Bitcoin script capabilities

4. **Developer SDK** - Match HandCash/Babbage features

Long Term (Q4 2025+)

1. **Full OS replacement** - Boot from USB/ISO

2. **Hardware integration** - Native device support

3. **Enterprise features** - Business tools

4. **Decentralized infrastructure** - P2P capabilities

📝 Action Items

Immediate Actions

- [x] Create @bitcoin-os/bridge package
- [ ] Monitor MetaNet Desktop commits weekly
- [ ] Track BSV SDK updates
- [ ] Document their UI/UX patterns
- [ ] Analyze their user onboarding

Ongoing Monitoring

- Check https://github.com/bitcoin-sv weekly
- Monitor https://bsvblockchain.org/projects/
- Track BSV conference announcements
- Watch for new tool releases

🎯 Key Differentiators to Maintain

1. **Bitcoin OS is an OS, not just a wallet**
2. **Unified ecosystem vs fragmented tools**
3. **Modern web tech vs older frameworks**
4. **Better developer experience**
5. **Stronger branding and vision**
6. **Open development vs closed ecosystem**
