

# THE BITCOIN CORPORATION

## Bitcoin Corporation Ltd - Tokenization Model

*Revolutionary Developer Ownership Framework*

Document Version: 1.0 | Date: November 2025 | The Bitcoin Corporation LTD

---

### Company Structure

---

- **Company Name:** The Bitcoin Corporation Ltd
- **Company Number:** 16735102
- **Registered:** England and Wales
- **GitHub:** <https://github.com/bitcoin-corp>

### Token = Equity Model

---

#### Core Innovation

Unlike BSV/MetaNet which are just open-source projects, Bitcoin OS tokenizes development:

- **Tokens = Dividend-bearing shares** in Bitcoin Corporation Ltd
- **Developers earn tokens** for contributions
- **Real equity** in a registered UK company
- **Profit sharing** from all Bitcoin OS revenue streams

### Token Distribution

---

#### Development Allocation (70%)

- **Core OS Development: 40%**
  - bitcoin-os repository contributions
  - Core infrastructure work
  - System architecture
- **App Development: 20%**
  - Individual app contributions
  - New app creation
  - App maintenance
- **Bridge/Infrastructure: 10%**
  - @bitcoin-os/bridge package
  - Developer tools
  - Documentation

## Business Allocation (30%)

- **Founding Team: 10%**
- **Marketing/Growth: 10%**
- **Strategic Reserve: 10%**

## How It Works

---

### For Developers

1. **Contribute Code** → Submit PR to bitcoin-corp repos
2. **Get Reviewed** → Code quality and impact assessed
3. **Earn Tokens** → Tokens allocated based on contribution
4. **Receive Dividends** → Share in company profits

### Token Calculation

```
tokens_earned = (lines_of_code × complexity_factor × importance_factor) /
total_contribution_pool
```

### Contribution Types & Rewards

Contribution Type	Base Tokens	Multiplier
Bug Fix	10-50	1x

New Feature	50-500	2x
New App	500-5000	3x
Core Architecture	1000-10000	5x
Security Fix	100-1000	3x
Documentation	10-100	1x

## Revenue Streams

---

### Direct Revenue

1. **Enterprise Licenses** - Custom Bitcoin OS deployments
2. **Premium Features** - Advanced apps and tools
3. **Support Contracts** - Business support
4. **Transaction Fees** - In-OS transactions
5. **App Store** - Revenue share from third-party apps

### Token Value Drivers

- Company profits → Dividends to token holders
- Increased adoption → Higher enterprise demand
- More apps → More revenue streams
- Network effects → Exponential value growth

## Competitive Advantage Over BSV/MetaNet

---

Aspect	Traditional Open Source (BSV/MetaNet)	Our Model (Tokenized Equity)
Developer Rewards	✗ No direct developer rewards	✓ Direct token rewards for code
Contribution Model	✗ Contribution = Volunteering	✓ Real company shares
Equity Participation	✗ No equity participation	✓ Dividend payments
Funding Model	✗ Funded by foundations/VCs	✓ Aligned incentives

Developer Ownership	✗ Developers don't share in success	✓ Developers are owners
---------------------	-------------------------------------	-------------------------

## Implementation Phases

---

### Phase 1: Setup (Q1 2025)

- ☒ Register company
- ☒ Create GitHub organization
- ☐ Deploy token smart contract
- ☐ Set up contribution tracking
- ☐ Initial token allocation

### Phase 2: Launch (Q2 2025)

- ☐ Open contribution program
- ☐ First token distribution
- ☐ Public documentation
- ☐ Developer onboarding

### Phase 3: Growth (Q3-Q4 2025)

- ☐ First dividend payment
- ☐ Token exchange listing
- ☐ Enterprise partnerships
- ☐ Expand development team

## Legal Framework

---

## Compliance

- UK company law compliance
- Security token regulations
- KYC/AML for token holders
- Transparent governance

## Token Rights

- Dividend entitlement
- Voting rights (major decisions)
- Transferable (with restrictions)
- Audit rights

## Success Metrics

---

### Development Metrics

- Number of contributors
- Code commits per month
- Apps developed
- Bug fix rate

### Business Metrics

- Token holder count
- Revenue growth
- Dividend payments
- Market capitalization

## Important Links

---

### Our Resources

- **Company:** The Bitcoin Corporation Ltd (#16735102)

## **Token Documentation**

- **Whitepaper:** [Coming Soon]
- **Token Contract:** [To Be Deployed]
- **Contribution Guide:** [In Development]

**This model makes Bitcoin OS the first truly developer-owned operating system**

**Every line of code = ownership in the company**

**Every contribution = future dividends**

**Every developer = shareholder**

**Join us in building the future of Bitcoin, where developers are owners, not volunteers.**
