Bitcoin Corporation - GitHub Organization Structure

🏢 Organization: github.com/bitcoin-corp

The Bitcoin Corporation Ltd (UK Company No. 16735102) maintains a comprehensive GitHub organization for the Bitcoin OS ecosystem.

📁 Repository Structure

```
github.com/bitcoin-corp/
│
├── 🖥️ Core Operating System
│ └── bitcoin-OS/ # Main OS repository ($bOS token)
│ ├── packages/
│ │ └── bitcoin-os-bridge/ # NPM package for app integration
│ └── docs/ # OS documentation
│
├── 📱 Bitcoin Applications (Each with its own token)
│ ├── bitcoin-writer/ # Writing platform ($bWriter)
│ ├── bitcoin-email/ # Email client ($bEmail)
│ ├── bitcoin-music/ # Music platform ($bMusic)
│ ├── bitcoin-wallet/ # Wallet app ($bWallet)
│ ├── bitcoin-drive/ # Cloud storage ($bDrive)
│ ├── bitcoin-calendar/ # Calendar app ($bCalendar)
```

```
│ ├── bitcoin-exchange/ # DEX platform ($bExchange)
│ ├── bitcoin-search/ # Search engine ($bSearch)
│ ├── bitcoin-video/ # Video platform ($bVideo)
│ ├── bitcoin-spreadsheet/ # Spreadsheet app ($bSpreadsheet)
│ ├── bitcoin-chat/ # Chat app ($bChat)
│ ├── bitcoin-pics/ # Photo sharing ($bPics)
│ ├── bitcoin-domains/ # Domain registry ($bDomains)
│ ├── bitcoin-shares/ # Stock platform ($bShares)
│ └── bitcoin-jobs/ # Job board ($bJobs)
│
├── 🔧 Infrastructure
│ ├── bitcoin-contracts/ # Smart contracts ($bContracts)
│ ├── bitcoin-os-bridge/ # Shared components (NPM package)
│ └── bitcoin-sdk/ # Developer SDK ($bSDK)
│
├── 🏛️ Governance & Documentation
│ ├── bitcoin-corp/ # Corporate governance ($bCorp)
│ ├── governance/ # DAO documentation
│ ├── tokenomics/ # Token economics
│ └── whitepaper/ # Technical documentation
│
└── 🔬 Research & Development
├── bitcoin-ai/ # AI integration ($bAI)
├── bitcoin-quantum/ # Quantum resistance ($bQuantum)
└── bitcoin-metaverse/ # VR/AR OS ($bMeta)
```

🪙 Token Hierarchy

Master Token

- **$bCorp -** The Bitcoin Corporation Ltd master token

- Total Supply: 1,000,000,000

- Controls governance of entire ecosystem

- Receives percentage from all child tokens

Platform Token

- **$bOS** - Bitcoin Operating System token

  - Total Supply: 1,000,000,000

  - Platform governance and fees

  - Required for premium OS features

Infrastructure Tokens

- **$bContracts** - Smart contract infrastructure

  - Total Supply: 1,000,000,000

  - Governs contract upgrades

  - Earns from all contract interactions

Application Tokens

Each application has its own token with 1 billion supply:

- $bWriter, $bEmail, $bMusic, $bWallet, etc.
- Application-specific governance
- Revenue sharing within app ecosystem

🔄 Development Workflow

1. Hierarchical Updates

```
bitcoin-OS changes
↓
Propagate to all apps via bitcoin-os-bridge
↓
```

```
Apps inherit updates automatically
```

2. Token Distribution

```
Developer submits PR → Merged → GitHub Action → Smart Contract → Tokens issued
```

3. Cross-Repository Integration

- Shared components via `@bitcoin-os/bridge` NPM package
- Common smart contracts from `bitcoin-contracts`
- Unified design system across all apps

👥 Access Control

Repository Permissions

- **bitcoin-corp**: Admin team only
- **bitcoin-OS**: Core maintainers
- **bitcoin-apps**: App-specific maintainers
- **bitcoin-contracts**: Security team + auditors

Token Allocation Rights

- PR mergers trigger automatic token distribution
- Based on contribution type and complexity
- Managed by smart contracts in `bitcoin-contracts`

🎯 Strategic Advantages

vs Traditional Open Source (BSV/MetaNet)

Feature Bitcoin Corp Traditional OS

Organization Unified under bitcoin-corp Fragmented

Token Economy Multi-token with atomic swaps Single or no token

Governance Token-based DAO Foundation/Corporate

Developer Incentives Automatic token rewards Volunteer/Salary

Revenue Model Token appreciation + dividends Donations/VC

🚀 Migration Status

Completed ✅

- [x] Created bitcoin-corp organization
- [x] Transferred bitcoin-OS repository
- [x] Created bitcoin-contracts repository
- [x] Set up legal framework (Open BSV License)

In Progress 🔄

- [ ] Create individual app repositories
- [ ] Deploy smart contracts
- [ ] Set up GitHub Actions for token distribution
- [ ] Migrate existing apps to new structure

Planned 📅

- [ ] Launch token distribution program
- [ ] Open contributor program
- [ ] First dividend distribution
- [ ] Exchange listings

📊 Success Metrics

- **Repositories**: 20+ active projects

- **Contributors**: Target 100+ developers
- **Token Holders**: Target 10,000+ holders
- **Code Commits**: 1000+ per month
- **App Downloads**: 100,000+ users
